

Ultra Short Throw Projector

Ideal for both replacement and new-build projects

Casio's new lamp and mercury-free Ultra Short Throw projector can be mounted close to the wall and create large, powerful presentations even in smaller rooms.

The main benefit of Ultra Short Throw projection is that it virtually eliminates shadowing on the screen allowing for more creative and engaging presentations.

The Ultra Short Throw model offers brightness of 3,100 ANSI lumens – more than enough for even a large, bright classroom or meeting room and features WXGA resolution with XGA compatibility option.
