## Unrivalled value, versatility and superior image quality

---

From energy saving features, to low maintenance cost, to a myriad of standard features, and the best industry warranty and support, the Christie® E Series offers unrivalled value.

Built with proven DLP® technology, the Christie E Series provides trusted performance and reliability, and exceptional image quality for small auditoriums, boardrooms, classrooms and places of worship. With a design that includes color matching, image blending and warping and stacking capabilities, the Christie E Series is ready for the challenges of fixed installs and rental/staging applications.

Our flexible platform operates in single or dual-lamp modes, giving you brightness options for any application. Ideal for 24/7 operation, the filter-free, dust-sealed design prevents dust and dirt from affecting the projector – ensuring that image quality is upheld and maintenance costs are minimal. A full suite of optional lenses give you more options to meet your needs.

With four to choose from, these models offer native HD or WUXGA resolutions in a compact chassis, and come backed by Christie's industry leading warranties, service and support.

◀ Four models available: Christie DHD675-E, Christie DWU675-E, Christie DHD775-E, and Christie DWU775-E

# Spectacular images engage your audience

Displaying exceptional images doesn't necessarily have to come at a premium. The Christie E Series offers excellent image quality without breaking your budget.

The Christie E Series produces images with incredible color and brightness. With the addition of Dynamic Contrast, your images are further enhanced by increasing the contrast ratio to 5000:1. This series ships standard with a high brightness, six-segment color wheel, and offers an optional six-segment rich color wheel for applications that require the best possible color accuracy. With four models ranging in brightness, the E Series will make your images shine every time.

## High brightness

The E Series is the brightest in its class.

- Christie DHD675-E: 5850 ANSI lumens (6450 center lumens)
- Christie DWU675-E: 6100 ANSI lumens (6700 center lumens)
- Christie DHD775-E: 6400 ANSI lumens (7000 center lumens)
- Christie DWU775-E: 6700 ANSI lumens (7200 center lumens)

▲ Christie E Series high performance lamp

▲ Optional six-segment rich color wheel (RGBCMY)

## Lamp options

The Christie E Series can be used in dual or single lamp mode.

Dual lamp	Higher brightness.
Single lamp	By switching between each lamp on power-up, the projector can operate for long periods of time (4000 hrs typical) before lamp replacement is needed.  The E Series optical system adjusts to optimize the light coupling between lamp modes resulting in higher lumens in single lamp mode as compared to the competition. So a 7000 lumen dual lamp projector becomes 4700 lumens when operating in single lamp mode instead of 3500 lumens. That's 34% brighter than the competition while in single lamp mode.

## Six-segment color wheel

The Christie E Series comes standard with a six-segment brightness color wheel designed to maximize applications where high brightness is a requirement and a wide color gamut is a priority. For applications where precise color and graphics are required, we offer an optional six-segment rich color wheel designed with a wider color gamut to maximize rich colors.

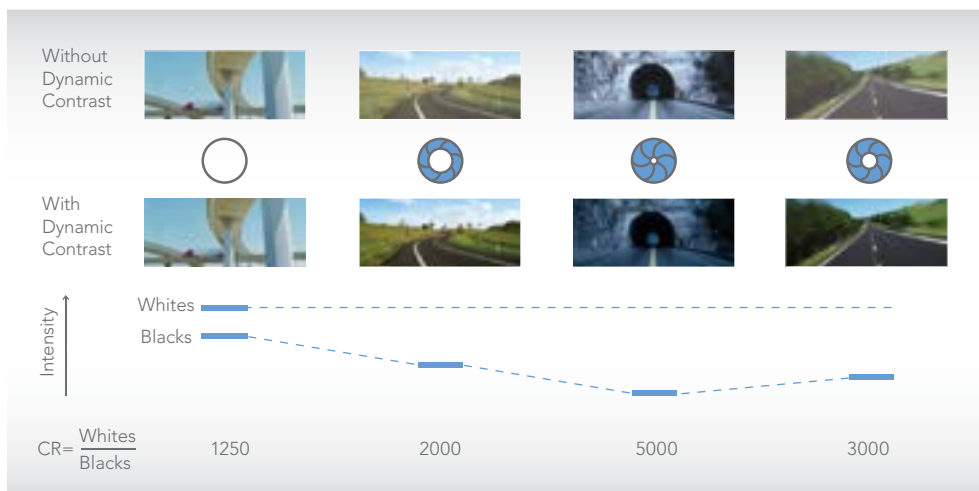

## Two resolution options

Native HD model	Ideal for maintaining brightness
WUXGA model	Ideal for graphic intensive applications

▲ 1-chip DLP technology

## Dynamic Contrast

With the Dynamic Contrast enabled, up to 5000:1 contrast can be achieved. Ideal for video applications, the Dynamic Contrast automatically adjusts an internal iris to extend the range of blacks and provide richer details during dark content for true image reproduction.

## Color matching

When used with multiple projectors, this feature ensures accurate color matching and uniformity across the entire image.

## Color matching

## Constant intensity mode

For tiled arrays, the constant intensity mode automatically increases brightness as the lamps wear out over time in order to maintain the overall brightness and image consistency across the display.

▲ Without constant intensity mode

▲ With constant intensity mode

## Constant intensity mode

# Designed for your application

What does unrivalled mean? It means a comprehensive set of features and options that increase value while minimizing the need to purchase “out of projector” technologies. Exactly what you get with the Christie E Series.

If you’re looking for exceptional image quality, flexible installation, and ease of operation, look no further than the Christie E Series. Wireless connectivity opens the door for easy connection and clean presentation space. A full suite of lenses, input options and 360 degree projection are all designed to give you the flexibility to pick what works best for your application. The E Series is not only ideal for fixed install applications; the optional stacking, blending and warping capabilities also make it a great option for any staging application.

▲ Christie E Series remote

▲ 360 degree projection

## 360 degree projection

Christie E Series models can project on table top, be ceiling-mounted, straight down or straight up. However you spin it, the Christie E Series will fit your needs.

## Projector control

Control the projector through a web user interface. SNMP (simple network management protocol) lets you remotely monitor a Christie projector and get status changes on various parameters.

## Ready for staging applications

- Rugged design
- Stacking capabilities
- Color matching
- Constant intensity
- Blend and warp capabilities

## Motorized zoom, focus, lens shift and mechanical shutter

For easy installation and configuration, the Christie E Series comes with motorized zoom, focus and lens shift to ensure your image is aligned tight within the desired viewing area for each and every presentation. The mechanical shutter allows for quick pauses in your display when the need arises to shutter the image.

## 24/7 capability

The Christie E Series offers sealed, dust-free housing, heat-pipe cooling system and dual lamp design that enable the projectors to run 24 hours a day, 7 days a week in continuous operation.

## Christie Presenter

The Christie Presenter application allows up to four remote desktops from host PC's to be displayed on the network through Ethernet, USB, or wireless transports. It can adapt to different network settings (DHCP, fixed IP, and direct link by USB/Ethernet cable).

## Blending and warping capabilities (optional)

Coupled with the internal color matching functions, blending and warping capabilities enable the projector to be used in applications where large image canvases are needed. An optional dual processor warp module is required to blend and warp displays.

# Going above and beyond

In addition to high quality products, what makes Christie different from everyone else?

We go above and beyond to take care of our customers. Customers keep coming back to us because they can't get the same level of support anywhere else.

We care about our customers. Your satisfaction is our ultimate goal. We stand behind our products and support you with our second-to-none warranty and service programs.

## Support and Service

All Christie products are backed by industry-leading warranties, renowned service and support. We ensure our customers are well supported with training, service and technical support through our extensive distribution and support network.

Christie has local support on five continents offering support for international installations and global deployments.

We offer customer-centric service with years of extensive experience in a variety of applications.

## Environment

At Christie we recognize our responsibility to control the impact of our business on the environment. We take pride in offering eco-friendly features in our products that are not only good for the environment, but also lower total cost of ownership for our customers.

Christie E Series includes features that support our commitment to being eco-friendly.

- Eco mode
- 0.5W standby mode
- Auto shut down
- Sleep timer: save energy by controlling when the projector goes to sleep
- Single lamp mode
