CONTROL OPTIONS

Accessories

Euroscreen® Control Box is included to add additional controls for convenience.

The basic add-ons are:

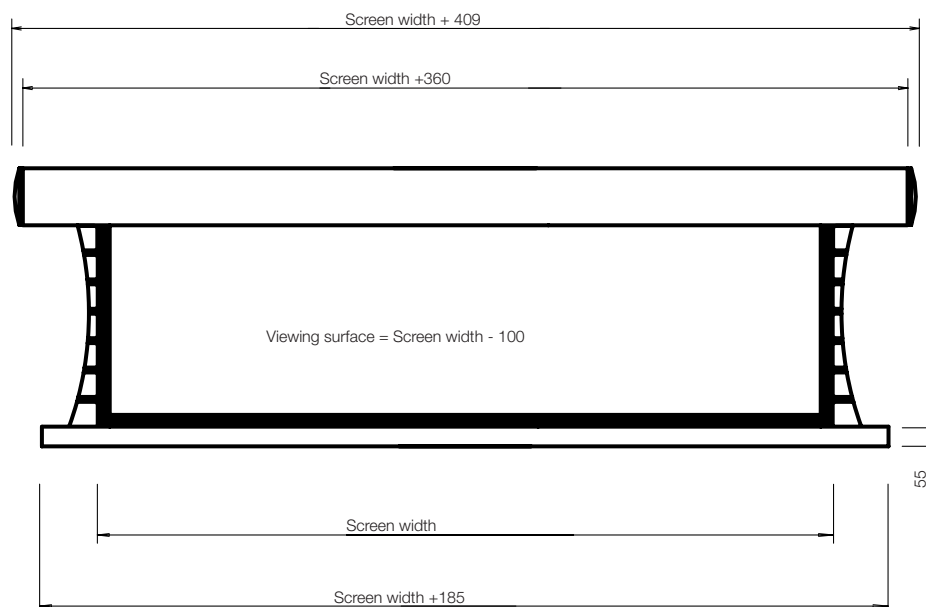

- RF remote control
- IR transmitter
- RF AutoLink
- 12V trigger cable

For full description of options please see separate spec sheet.

The Linea Tab Tension cassette has a unique designed shape which consists of gently rounded aluminium, with no exposed mounting fixtures or fasteners, and all attachment points are completely invisible. The case is finished in white and the white heavy weight bottom dowel retracts completely inside the case when the screen is not in use. Thanks to the tensioning wires, which are integrated along the screen surfaces vertical edges, a fully flat screen surface can be obtained for many years in use. A perfectly flat screen surface is a requirement when using Short Throw projectors where the wide angled projector lens put higher demands on the quality of the projection screen.

Delivered with 30cm as standard. "No borders" are standard on all rear projection screens and available on request for the other surfaces. Screen delivered for wall mount, prepared for ceiling mount. Ceiling mount requires rewiring. Motor to the left as standard. Quiet motor available upon request. Please note: The surfaces are sensitive to heat and are not suitable as black-out, or sun protection. Do not install close to heat sources like radiators, amplifiers or turned on TV-sets.
