# Short-throw projector for flexible installation in small working environments

### Fully Featured

#### Short Throw Projection

Using a projector in small classrooms and meeting rooms used to be difficult due to insufficient projection distances. Not any more! The EX320U-ST requires a mere 74cm for the projection of clear and concise images which are approximately the size of a 60-inch whiteboard. It can be set on the edge of a tabletop, eliminating the loss of workspace commonly caused by the need to clear a path for the projection light.

#### Projected Image comparison (with 60-inch screen)

EX320U-ST

Tabletop dead space is minimized, effectively leaving workspace open for documents and other items.

Mitsubishi conventional model [Projection distance of 200cm\*(77")]

Conventional projectors require a significant amount of dead space for projecting images.

#### Advanced Network Management

#### 3D READY - Enjoy the future today

Experience the impact and allure of 3D images. The 3D video content must be in field sequential format and special electronic shutter glasses are required.

- Top-loading lamp

A lamp replacement attachment is included to prevent the lamp from being dropped during replacement.
