Specifications

Model	WD3300U	XD3200U
Display Technology	0.65" 1-Chip DMD	0.7" 1-Chip DMD
Resolution	1280×800 (Total 1,024,000 pixels)	1024×768 (Total 786,432 pixels)
Brightness	4000lm	4500lm
Contrast	2300 : 1 (on / off)	2500 : 1 (on / off)
Picture Size	40"– 300"	
Projection lens	f=24.5-33.1mm, F=2.0-2.4	
Offset axis	10 : -1	10 : 0
Throw Ratio	1.7 ~ 2.4	
Source Lamp	264W (Shut-off Time 4000hr) with Low Mode / 330W (Shut-off Time 2000hr) with Standard Mode	
Computer Compatibility	640×400 ~ 1600×1200 True: 1280×800, Sync on Green available	640×480 ~ 1600×1200 True: 1024×768, Sync on Green available
Video Compatibility	NTSC / NTSC4.43 / PAL (including PAL-M, N) / SECAM / PAL-60, Component Video: 480i/p (525i/p), 576i/p (625i/p), 720p (750p 50/60Hz), 1080i (1125i 50/60Hz), 1080p (1125p 50/60Hz), SCART (RGB+1V sync)	
Pc Input Terminals	mini D-sub 15pin×1, 5 BNC×1, DVI-D (with HDCP)×1 Audio: stereo mini jack(ø3.5mm)×3	
Video Input Terminals	Video: HDMI(ver.1.2)×1, RCA×1 or BNC×1, S-Video(4pin)×1 or S-Video Y/C(BNC) Audio: RCA (L, R)×2	
Output Terminals	RGB: mini D-sub 15pin×1, DC Out: 5V 1.5A (MAX) Audio: stereo mini jack (ø3.5mm)×1	
Communication Terminals	LAN (RJ-45)×1, RS-232C:D-sub 9pin×1, USB×1 (Mouse control), Wired remote in: stereo mini jack (ø3.5mm)×1 Wired remote out: stereo mini jack (ø3.5mm)×1	
Audio Speaker	10W mono	
Fan Noise	26dBA (Lamp Low Mode)	
Dimensions(W×H×D)	450×187×373mm/17.7×7.4×14.7 in (excluding terminal cover)	
Weight	10.3kg /22.7lbs (excluding detachable terminal cover)	
Power Supply	AC100 - 240V, 50/60Hz	
Optional Accessories	Lamp: VLT-XD3200LP Lens: OL-XD2000SZ, OL-XD2000LZ, OL-XD2000TZ, OL-XD2000FR	
Warranty	3-Years Parts/Labor, 3-Years Express Replacement Assistance, 1-Year or 500 hours lamp warranty (whichever comes first)

The New WD3300U and XD3200U
Comfort Redefined

Large-screen reproduction of high-quality images. Breathtaking and powerful.

But image quality is not the only improvement to our large-screen projectors.

Mitsubishi Electric's new projectors are designed for easy installation and maintenance,

superior operability and a comfortable viewing experience.

Welcome to the future of high-lumen projectors.

Operation simplified with Mitsubishi Electric's user-friendly design

### Low Maintenance & High Durability

New Color Wheel System

Dust would easily accumulate on the color wheel sensors of previous models. However, the sensor is now mounted in the rotary shaft motor casing, which is almost fully enclosed, making it much more resistant to dust.

Previous color wheel

Photo Sensor
Timing Mark
Optical Signal

Dust would accumulate on the sensor and thick part of the timing mark, blocking the light path when using the light signal method. This dust build-up interferes with the color distinction process, causing poor color alignment.

New color wheel

Fixed
Hall-effect IC
Magnet — Magnetic Signal
Less than 1mm

The base spins together with the color wheel. The wind pressure created by the centrifugal force keeps dust from entering through the gap (less than 1mm or 1/25in). The magnet is embedded in the base, so there is no protruding part for dust to accumulate on. Since a magnetic signal method is used, the signal passes through any dust without the problem of color distortion.
Filter free

DLP™ projectors are virtually airtight, therefore an intake filter isn't needed, eliminating the need for filter changing and ultimately lowering overall cost.

Long 4000hr Lamp Life

The WD3300U/XD3200U has a lamp temperature controlling system that enables an estimated lamp life of up to 4000hours.*[1] Long-life lamps make dramatic reductions in overall cost of ownership by reducing the frequency of lamp replacement.

Lamp Replacement Frequency*[2]

2,000hr lamp
Original Lamp | 1st replacement
Reduced Lamp Replacements
2,000 hours

4,000hr lamp
Original Lamp
4,000 hours

(*1): When lamp is used in "Low" mode. Maximum life in "Standard" mode is 2000hr.
(*2): Lamp life refers to the average time required for brightness to be reduced by half, and not the time specified in the warranty. Usage time may vary widely according to the environment and conditions, and whether or not cleaning and other maintenance procedures are followed.

New Lamp Drive System

Arc Discharge

Initially, the gap between the electrodes is small and the arc density is high, resulting in high brightness.

Electrode

The distance between the electrodes increases as they wear. This causes a decrease in arc density, which also results in a loss of brightness.

Adoption of a new lamp drive system prevents electrode wear—giving the lamp a longer service life and enabling it to retain projection brightness over a longer period of time.

Electrode Abrasion
100%
0%
— Conventional Lamp Drive System
— New Lamp Drive System
Total Lamp Usage in Hour

Up until now, the electrodes in the lamp deteriorated quicker when using the projector for extended periods of time, resulting in a loss of brightness. These projectors incorporate an optical design that optimizes lamp operation to realize a lamp drive that makes it possible to stabilize the shape of the electrode during long-term use. As a result, the maximum lamp service life is obtained for every projection mode and loss in projection brightness is extended over a longer period of time.

Side Access Lamp & Center Lens Designs

The lamp can be accessed from the side of the projector, simplifying the replacement process, as the projector does not have to be turned around when sitting on a shelf or turned over when suspended from the ceiling. The center-set lens design makes set-up easy since the projector lens need only be aligned with the center of the screen.

Quick Lens Change

The top cover has a removable section around the lens. This advanced feature enables the lens to be changed without removing the entire top cover.

User Friendly

Ultra - quiet 26dBA Operation

The fan noise from a projector can be annoying during a presentation or videoconference—but with the adoption of a hermetically sealed color wheel and improved air duct path, that's a thing of the past.
The WD3300U and XD3200U have a significantly low fan noise of only 26dBA (lamp in Low mode). As a result, audiences can enjoy presentations and conferences without the distraction of projector noise.

Fan noise
Fan noise
Air flow
Air flow
Air flow
Fan

The air duct flow design has been improved so that fan noise doesn't interfere with the intake-air flow. Additionally, fan noise is blocked from direct exit, resulting in a significant reduction in operation noise.

User Logo Projection

A user-created image (logo, picture, etc.) can be loaded into the projector and used as the start-up image or the stand-by screen.

Environmentally Friendly

In order to lessen our impact on natural resources, we have engineered specific eco-friendly features including:

· Low Standby Power
When in Standby mode, the projector consumes less than 1Watt* of power

· Recycled Paper
The carton, and all paper materials within are made from recycled paper

· Eco-friendly design
The use of lead-free solder further minimizes impact on the environment

MITSUBISHI
GREENER TECHNOLOGY
COMMITTED TO GREENER TECHNOLOGY THROUGH CONSERVATION

* Less than 2W in Normal mode (network turned on).

Stunning Beautiful Colors & High-quality Design

Brilliant Color ™ and Mitsubishi Electric Engineering Yield Superior Color Performance
Brilliant Color™, one of the latest innovations from Texas Instruments, produces amazingly rich and vibrant colors. We developed a 5-segment color wheel (R, G, B, W and Y), and by combining it with Brilliant Color™ and selective lamp-powered modulation techniques—the WD3300U and XD3200U intelligently reproduce colors that improve the intensity and vibrancy across the entire screen.

w/o-BrilliantColor™
BrilliantColor™
Yellow reproduction improves

4-segment (RGBW) color wheel
5-segment (RGBWY) color wheel

· Lamp Power Modulation

Presentation Mode (for high brightness)
Light intensity increases for the white and yellow segments of the color wheel, giving greater emphasis to bright colors in more vivid tones.

Super - bright 4500lm

The XD3200U delivers super - bright 4500lm images. It's the ideal brightness for giving presentations in large meeting rooms and conference halls.

3000lm
4500lm

Precise Gradation Reproduction

● Well-established DDP3020 DLP™ data processor
● High-speed LVDS (low-voltage differential signal)
● 10-bit I/P conversion circuit eliminate jaggies

Additional useful functions

● **Motor-driven Lens Shift* & High Contrast of 2500:1***
    * Function adjusts image in four directions (up/down/left/right) without touching the projector.
    ** XD3200U only. WD3300U contrast is 2300 : 1.

● **LAN Control**
    Connect a computer with ProjectorView™ installed to a LAN for wired operation and monitoring of several different projectors.
