

## **NEC MultiSync® P801**

Order Code: 60003481

**NEC LCD 80" Large Format Display** 

The Reference MultiSync® P801 is the flagship model in the new P Series range, giving the ultimate size and quality image for content that will capture the imagination and attention of your visitors. The display can be pre-configured before it is installed via our innovative new Android App and NFC sensor offer saving installation time and cost. A focus is also placed on reducing power consumption and lowering running costs with the LED backlighting and Human Sensor which can manage the power of the display depending upon viewer proximity.

This display is ideal for any heavy duty application from retail to control rooms or as a projector replacement in high brightness meeting rooms and can be combined with an integrated OPS WiDi.

## **DELIVERING GENUINE BENEFITS**

**Programmable Ambient Light Sensor -** for reduced power consumption and eye pleasing brightness levels.

**Future Ready with OPS Cable Free Expansion -** Upgrade the power of your display at any time without the need for external cables or devices.

**DICOM support-** for medical applications.

Free DisplayNote Presenter Licence - present, share, collaborate with multiple participants across multiple devices (available until May 2014). Visit www.displaynote-nec.com.

Free Download of Multi-Display Management Software - with NaViSet Administrator 2 you can manage all your connected display devices from a centralized location.

## **OUTSTANDING PERFORMANCE**

- Reduce Installation and Operating Costs. The combination of LED back lights, Intelligent Wireless Data (NFC), programmable Ambient Light Sensor and (optional) OPS Slot-in PCs delivers the lowest installation and operating cost of any public display on the market.
- Intelligent Wireless Data (based on NFC). The built-in near field communication (NFC) chip allows data to be read and written with a mobile phone or tablet PC. Using the NEC Android app the user can pre-configure the display e.g. LAN settings, language etc. by holding an NFC capable device close to the display. All data will be transferred to the screen without the display needing power. This reduces set up and installation time and cost.
- **Human Sensor.** Save on power and reduce operating cost when the display operates at a very low brightness level and only switches to a higher brightness when a person is nearby. This optional feature can also be used for creative signage to e.g. switch inputs automatically to change from entertainment to information when a person approaches the screen.
- Interface Extension. This slot offers unique flexibility for additional connections with the choice of adding a single digital or two analogue boards.

- 1. Power
- 2. Main Switch
- 3. Speaker connectors
- 4. Internal / External speaker switch
- 5. Audio out
- 6. USB port for service (firmware upgrades)
- 7. LAN daisy chain with SNMP (LAN switch and LAN / RS232 / remote loop through)
- 8. 2x Audio in
- 9. RS232 in
- 10. Remote in for external human / ambient sensor
- 11. VGA + Component input
- 12. DP 1.2 loop through
- 13. HDMI 1.4a
- 14. DVI-D

## **SPECIAL CHARACTERISTICS**

Auto ID assignment, Auto tiling function, FREE DisplayNote Presenter, HTTP Server, Image flip, NaViSet Administrator 2, Point Zoom Function, Programmable 10-bit LUT with 3 memory banks, Sticky Note Function in OSD, User readable log function

**Energy Efficiency** 

Human Sensor; Ambient light sensor; Carbon savings meter; ECOMode

**Ecological Materials** Optional feet; Manuals on CD
