

WXGA 3LCD Projector with 2000 ANSI lumens.

VPL-BW7

HD Ready Home Cinema Projector

SONY

This HD Ready home cinema projector has been designed for use in brightly lit environments, so you don't need to dim the lights for a home cinema experience. The VPL-BW7 incorporates BrightEra™ technology invented by Sony which minimises degradation of colours over time, achieves higher brightness and sharper images in even well-lit rooms - and delivers exceptional reliability and longevity.

This projector is perfect for families wanting to watch a movie together, or other leisure pursuits such as gaming and viewing sport on a big screen. It features native WXGA (1280x800) resolution, making it ideal for true 16:9 widescreen display of film and video in stunning colour and exceptional detail, direct from a Blu-ray player, set-top box, games console or PC.

Key Features

BrightEra. BrightEra technology

This innovative inorganic panel technology was designed by Sony to deliver improved panel light resistance, higher brightness, higher resolution and increased panel reliability.

WXGA Resolution

The VPL-BW7 offers a widescreen format for WXGA resolution (1366 x 800) PC and 720P 16:9 aspect ratio video.

Colour Light Output – 2000 lumens

Colour Light Output is a metric that measures a projector's ability to deliver colour.

Built-in optical shift

A built-in 8° tilt angle gives a perfectly proportioned presentation on the screen or wall.

Short-throw projection

Achieve a pin sharp 80-inch image (diagonal) from just 2.3 metres away – providing you with maximum flexibility for positioning the projector, even in relatively small rooms.

HD Ready

The HDMI input means the VPL-BW7 is ideal for use with High Definition sources such as Blu-ray players, set-top boxes and games consoles.

2 x Power-saving modes:

Lamp Cutoff: Lamp cuts off if no signal is input for 10 minutes and lights again when a signal is input or any key is pressed.

Standby: The projector goes into standby mode if no signal is input for 10 minutes and power consumption reduced to less than 3W.

Off and Go

The projector is ready to be unplugged as soon as it is switched off. There is no need to wait for the fan to turn off.

Other Features

Image Freeze Function

Freeze the image displayed while you change your input source or make other changes without the audience knowing.

Easy to use

The projector's height adjuster is located at the back to make it easier to see the effects of moving it upon your projected image.

Digital Zoom (4x)

Magnify a portion of the image displayed by 4X.
