VPL-CH355, VPL-CH375 & VPL-CH350 Projectors

WUXGA resolution installation projectors
with 4000 – 5000 lumens brightness

Outstanding brightness, low total cost of ownership

VPL-CH355, VPL-CH375 and VPL-CH350

When it comes to equipping medium to large-sized classrooms or meeting rooms, cost is critical. The VPL-CH355, VPL-CH375 and VPL-CH350 are a cost-effective choice with no compromise on picture quality.

These projectors produce exceptional WUXGA images, between 4,000 and 5,000 lumens brightness and feature a host of energy-saving features to keep power consumption low. Because they use Sony's unique 3LCD BrightEra™ panel technology, images are brighter and more stable, colours are more consistent, vivid and natural, yet lamp life is much longer.

Connectivity with HDBaseT™

The VPL-CH355 and VPL-CH375 projectors allow simple connectivity with a single cable, using the HDBaseT™ Digital Interface (Video, Audio, Control, Ethernet) system. It's a cost-effective, long-distance and high-quality digital transmission solution.

The VPL-CH355 and VPL-CH375 are an excellent option for business and education: easy to use, low on maintenance and guaranteeing the ultra-high quality projection you'd expect from Sony.

ECO Lamp Dimming

Reduce power consumption and brightness by 10-15%. Pre-set a time so brightness and power consumption reduces to 30% if the projector is not in use. As soon as a new signal is detected, brightness returns to 100%, instantly.

ECO Picture Mute - (Instant Off/Instant On)

Reduce power consumption to 30%, saving costs and lamp hours. Useful between class changes or to redirect attention away from the screen in a business meeting, it means you don't have to completely power off or on, which can be time consuming.

4000/3000 Hours Lamp Life

Advanced lamp technology and an efficient cooling system ensures long lamp life. We recommend a lamp replacement time of 3,000 hours in standard lamp mode for the VPL-CH375 and 4,000 for the VPL-CH355 and VPL-CH350.

Features

High resolution WUXGA image

Incredible WUXGA resolution detail (1920 x 1200). Extremely clear and detailed high-quality images are projected, even on a large screen.

3LCD BrightEra™ Technology

Advanced 3LCD BrightEra™ panels produce a high brightness of between 4,000 and 5,000 lumens with increased reliability and natural, vivid colour reproduction.

Lens Shift Function

With fine lens shift range adjustment of +/- 5% vertical and +/- 4% horizontal, the projector can be positioned for picture-perfect projection and greater installation flexibility, avoid any minor ceiling obstacles.

1.5:1 to 2.2:1 Throw ratio

The VPL-CH355, VPL-CH375 and VPL-CH350 offer a throw ratio that can accommodate most medium to large classrooms or meeting rooms.

Designed to blend in

A low-profile chassis means the projector will appear to blend into the ceiling or wall on which it is mounted.

Flexible installation

As well as a smart, contemporary design the VPL-CH355, VPL-CH375 and VPL-CH350 provide excellent installation flexibility. The lens shift/zoom and image correction features mean any image will fit the screen, even from an offset projection angle.

Advanced energy-saving features

Advanced lamp technology enables robust energy-saving features. Auto Light Dimming mode offers greater brightness control and saves considerable energy when the projector is left on when not in use. During projection, Auto Picture Mode automatically adjusts light output to suit the projected scene. When you need to mute the picture temporarily, light output can be completely deactivated to minimise energy consumption.

Delivering higher picture quality, substantially brighter images and greater efficiency.

Ideal for:

- Education
- Visitor attractions and museums
- Corporate presentations
- Public sector
