

PJ513D

**VERSATILE, PORTABLE
SVGA DLP PROJECTOR**
WITH BRILLIANTCOLOR™ TECHNOLOGY

Easy to use, easy to afford

The ViewSonic PJ513D is a practical projector that offers outstanding value and performance on a budget. It performs well for those looking for a multifunctional data/video projector that doesn't break the bank. This native SVGA resolution projector which also supports high definition signals projects 2200 lumens of brightness for clear, bright images in most lighting conditions. At only 2.6kg, it is light, compact and easy to travel or move from room to room. Texas Instruments' latest BrilliantColor technology delivers brilliant, true-colour and high contrast images for viewing presentations, charts, or video. The Eco mode function reduces the fan noise output for less distraction during important presentations and even extends the lamp life up to 3000 hours. The PJ513D is perfect for users looking for an easy to use portable projector at a great price.

OUTSTANDING PRESENTATIONS

> Bright in virtually any setting

Packs 2200 ANSI lumens in just 2.6kg, and with a high 2000:1 contrast ratio, your presentations are guaranteed to be vibrant – even with a lot of ambient light.

> BrilliantColor Technology

Featured with an advanced 5 segment colour wheel and Texas Instruments' latest multi-colour processing BrilliantColor technology the PJ513D delivers significantly more accurate and vibrant colours compared to conventional DLP projectors.

> Automatic source detection for easy setup

The PJ513D comes with a fair selection of electronic features which ease the setup process. Whether it is the electronic keystone correction for maintaining a squared image or quickly selecting one of the 7 preset modes for different environment usages or the automatic signal detection - this projector will make your life easy.

> Supports HD signals and external monitor loop-through

Capable of displaying HDTV signals as well as other video and data sources¹. And with the extra VGA-out connector, the projected image can even be viewed on an external display.

> Dynamic Contrast Ratio

Dynamic Contrast Ratio can automatically detect the image signal and intelligently control the backlight brightness to make the black blacker in a dark scene, and make the white whiter in the bright environment.

> Warranty

Industry-leading three-year on-site warranty with one-year or 1000 hour lamp warranty.
