WyreStorm - Because the Technology Matters.

Introduction

An essential tool when mixing 4K & 2K screens on the same distribution system, the CON-H2-SCL enables in-line scaling of HDMI content. An HDMI signal from a source device, DA or matrix is converted so that it can be accepted by the connected display. Via a powerful scaling chip, 4K/60 4:4:4 or 4:2:0 can be down-scaled to as low as 480P; likewise, content can be up-scaled to 4K/60 4:4:4. Set up & configuration is done using a simple PC tool which is part of WyreStorm Management Suite V1.6. The software tool allows management of the scaling function and EDID via a simple interface.
